

DVR VMC VIDEO EXPORT 4G REMOTE DOWNLOAD FAQ

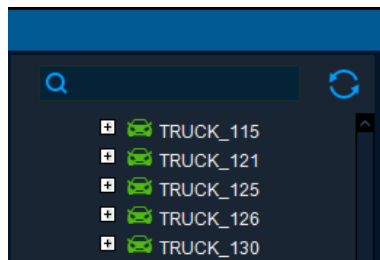

KOHLTECH Video Management Center (VMC) must be installed on computer to be used for viewing and export of DVR video/GPS files, Unless files are exported in MP4 format which can be viewed with media player.

4G Remote Download

1. Select Playback and Online

2. Choose the vehicle of interest from the Fleet table on left of screen. You may search.

3. Double click the appropriate Vehicle from Directory on left hand side of VMC which opens a calendar below Directory.

4. Dates on calendar that are green with red dot have recorded data. Dates that are blue have no data.

5. Double click on desired green date to load video and GPS data

6. Click scissor icon located above timeline

7. Set desired Start and End times

8. Click OK to open Clip Settings window

9. Confirm Start Time and End Time, select desired channel(s),

a. Highlight Export box to export Video AND GPS data viewable only using VMC software

b. Highlight MP4 to export ONLY Video viewable using MP4 players - www.videolan.org/vlc/

10. Choose Path: ie. DESKTOP or folder to export to

11. Leave Password blank

12. Highlight Main Stream box

13. Click OK to export files

14. Note that the speed of this process is constrained by the strength of 4G signal at vehicle and the speed of the Internet service in use and processor speed of the computer.
