AIR-ASSISTED AIRLESS TECHNOLOGY

HVLP QUALITY FINISH AT THE SPEED OF AN AIRLESS SPRAYER

Material is delivered to the gun at lower pressure than traditional airless (500-1500 psi vs. 1500-3000 psi) and partially atomized through a small tip. Full atomization is achieved by adding a small amount of air (5-35 psi) to the edges of the spray fan, resulting in a softer pattern, more control, higher transfer, and less overspray.

HIGH-PERFORMANCE FINE FINISH SPRAYING FINISHPRO II AIR-ASSISTED AIRLESS SPRAYERS

Only Graco delivers industry-leading features along with proven quality and unmatched performance in a portable, self-contained, air-assisted airless system.
